

**NOTES.** We therefore throw all the responsibility for the correctness of this table upon this city document. An attempt has been made to show the increments of this table by its disagreement with the corresponding table above referred to. But allowing Mr. Green's table to be correct, it amounts to but \$87,827 more than the table of this Council, out of a total of \$3,014,578—not enough to affect the main conclusion drawn from this table.

A careful reexamination by an experienced accountant, in connection with a committee, has been made of the table, which it was found that the figures of the table were substantially correct. The result of this reexamination is herewith submitted in the following table:
